

# Avalanche® COMPACT TRACTOR BOX PLOW

## Key Features:

### GRADE "8" BOLTS

To ensure extra durability, all Avalanche plows are crafted using heavy duty grade "8" fasteners.

### MOUNTING OPTIONS

a. **BUCKET MOUNT RECEIVER:** Allows any compact tractor or skid steer with a bucket to connect to the Avalanche unit. Drive in between the receiver plates, fasten chains on either side and begin to plow. Receiver made from solid steel plate.

b. **UNIVERSAL COUPLER:** Fits all compact tractors equipped with a skid steer coupler. Just drive into the receiver cups and lock in the coupler.

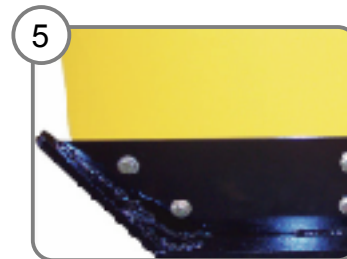

### FIXED RUBBER EDGE

CTA-100 & CTA-SC models are equipped with a fixed rubber cutting edge. Using a top-of-the-line 85- durometer rubber compound in the cutting edge gives it a long service life. The cutting edge is reversible and adjustable. Choose Avalanche® rubber edge models for that squeegee- like cleaning of

### SIDE PANEL BRACE

Avalanche® CTA & CTA-SC models are equipped with one square tube side brace. The engineered braces prevent the 24" high side panels from buckling under plowing stress or impact. They are positioned to withstand the maximum amount of impact.

### PLOW EDGE OPTIONS

Fixed wear shoes are standard on all rubber edge models (SSA-100). All Avalanche® fixed wear shoes are made with AR 400 steel.
